I. Final Site Plan: (Scale 1/10" = 1'0")

Location of all proposed improvements with dimensions and materials should be illustrated on the site plan. Please include a lot survey if available. The site plan should include:

- A. Grading Plan/Landscape plan with 2' interval contours (5' as from USGS is accepted for simple contours).
- B. Erosion control measures to be installed.
- C. House, garage(s) and all improvements to be installed within the lot envelope.
- D. Front, rear and side setbacks to property lines should be dimensioned, with lake buffer indicated.
- E. Driveways, sidewalks and any easements from the recorded plat.
- F. Fences and walls (including retaining walls).
- G. Septic field and repair area.

The ARB will conduct an on-site observation of the rough staking of your house footprint on the ground prior to excavation. Please call to schedule this inspection.

Site plan approved by: _____ Date: _____

COMMENTS: _____

II. Final House Plans: (Scale 1/4" = 1'0")

Preliminary "Not for Construction" plans are accepted for review but all changes after the review must be submitted and approved by the ARB 20 days prior to implementation. **A complete set of "As Built" must be submitted and will be kept on file by the ARB at the completion of the project.**
